

-----  
A- Read each statements and decide whether is true or false:

- 1- Input device accept data from microprocessor.
  - 2- A hard disk drive contain a non-removable disk built into system.
  - 3- In most cases, text editing keys help us to move around the screen.
  - 4- The magnetic drum is similar in concept to magnetic disk.
- 

B- Translate these sentences to farsi:

- 1- The basic operation of a microprocessor is regulated by the control unit.
  - 2- Information is recorded on the floppy disk in concentric circle "tracks".
  - 3- This memory part can retain the information for an indefinite period of time.
  - 4- Disk drive moves information stored on disks into and out of random access memory.
- 

C- Write a meaning for following words:

- |               |              |               |
|---------------|--------------|---------------|
| Distinction = | Complement = | Translate =   |
| Priority =    | Advantage =  | Modify =      |
| Sequential =  | Auxiliary =  | Manufacture = |
| Enclosed =    | Interface =  | Beam =        |
- 

D- Fill in the blanks with following words:

(based - register - commands - provides - way - cpu)

- 1- The keypad is a quick and easy ..... to type numbers.
  - 2- A floppy disk essentially ..... random access to the data stored upon it.
  - 3- The data to be output from the system is placed in a ..... connected to the data bus.
  - 4- ..... And data to be written on the tape are sent to the controller by microprocessor.
- 

E- Answer to these questions:

- 1- Why do we use the mouse device?
  - 2- What is the difference between laser ad hard disk?
  - 3- Why do we use the floppy disk?
- 

F- Read each statement and select correct items(a, b, c or d):

- 1- microprocessor send data to .....
  - a) output devices
  - b) input devices
  - c) I/O device
  - d) nothing

- 2- When our microcomputer is in letter A:, then we can use .....
- a) disk drive
  - b) floppy disk drive
  - c) tape drive
  - d) nothing
- 3- Peripheral devices generates data for .....
- a) output of a microprocessor
  - b) into a microprocessor
  - c) printer
  - d) keyboard
- 4- Laser disk is a type of .....
- a) main memory
  - b) auxiliary memory
  - c) part a and b
  - d) magnetic disk
- 

G- Write complete word for these abbreviations:

EEPROM =

RAM =

ALU =

---

H- Match left column with antonyms in right column :

- |               |            |
|---------------|------------|
| ( ) removable | 1- less    |
| ( ) more      | 2- slowly  |
| ( ) rapidly   | 3- single  |
| ( ) several   | 4- fixed   |
|               | 5- quickly |
|               | 6- signal  |
- 

I- Match left column with synonyms in right column :

- |             |              |
|-------------|--------------|
| ( ) usually | 1- prepare   |
| ( ) execute | 2- manually  |
| ( ) provide | 3- generally |
| ( ) thin    | 4- small     |
|             | 5- large     |
|             | 6- perform   |
